Blog

This week's blog is an interesting take on HFA-2 and climate change. [Read More](#)

Featured Article

Towards risk-resilient development : taking into consideration demographic trends and natural constraints

This resolution contains 28 recommendations and urges governments to engage in discussions on the post-2015 framework for disaster risk reduction. The resolution points to demographic dynamics and climate change as significant drivers of disaster risk, stressing that they put additional pressures on natural resources and ecosystems and increase the vulnerability of communities.
