Action planning at regional level - what are the next steps

LATIN AMERICA AND CARIBBEAN

Challenge: finding funding for local DRR initiatives
 (s.robson@RETAmericas.org)

Science-policy initiatives

At the University of Massachusetts Amherst (USA) we have started a large project working with all the state planning agencies and municipalities on developing a knowledge hub to (1) share best practices in resilience planning and (2) create collaborations toward innovative solutions. This includes NBS. -- It would be great to share our work with a larger network in case it is helpful to others. Moreover, I (and my colleagues) would love to participate in PEDRR initiatives offering a bridge between academia and policy makers -- This could be relevant beyond North America (Massachusetts is affected by severe coastal storms, coastal flooding, inland flooding and heat waves), we would be happy to connect with networks in other parts of the world facing similar issues.

New opportunities, ideas, projects, proposals

New project ideas

Raphael M. Ferrer
rmferrer@up.edu.ph

Increasing resilience and mental health of families in evacuation sites due to disasters.

Ricardo Cascante,
ricardocascante@gmail.com
Curso de Escenarios de Riesgo Local e incorporación de soluciones Eco-DRR / AbE para estudiantes universitario, gobiernos locales

Ricardo Cascante,
ricardocascante@gmail.com
Avance en la implementación de EcoDRR/EbA en los gobiernos locales en Costa Rica

Michelle García
(Mgs.stefany@gmail.com)
implementar este programa en colegios enfocado a jóvenes mediante cooperación entre el Ministerio de Educación y el el Ministerio de Ambiente del Ecuador. Se puede iniciar en Portoviejo, como proyecto piloto.

Empowering local bodies through proper policy, funds and capacity to move towards Eco-DRR approaches.
Neha Kurian
UNEP-KILA, Kerala, India
nehakurian@kila.ac.in

Rowena Osborne, Blue Edge (bidding organisation interested in supporting private sector to implement NbS0, can bring private sector views and challenges

Ma. Charisma T. Malenab
mtmalenab@up.edu.ph
Policy support and institutionalization of Eco-DRR approach in managing lahar landscapes and rural ecosystems

D.R. Hizbaron
dyah.hizbaron@ugm.ac.id
How EcoDRR/EbA being implemented into Spatial Planning?

Yen Truong - Root
(truonghoangyenfeb28@gmail.com)
cooperate with Cham ethnic woman to use Nature based solution to reduce soil erosion and harvest th

Integrating environmental awareness and nature based solutions with education through games and activities for children.
Ghadir - Palestine
gqawariq@gmail.com

Almira Geles de Mesa
ablumbres@up.edu.ph

Capacitation of Local Government Units in incorporating Eco-DRR/EbA solutions in development plans and implementation

Ma. Charisma T. Malenab
mtmalenab@up.edu.ph
Capacitation of Local Government Units found in rural areas in integrating Eco-DRR/EbA approaches in community development plans, implementation and evaluation

Ishanka Adikari(A.M.I.U.Adikari)
Graduate from University of Moratuwa, Sri Lanka, as a Landscape Architect.
I am interested in the Climate action induced Landscape Architecture and looking forward for my higher study opportunities to pursue my goals.
referring to the "green-grey" presentation. It was very interesting to finally find an exact project which is very much like my research. It is mostly coincide with what I was researching on for my fourth years' dissertation back in 2016 with mentor Professor Samantha S.L. Hettiarachchi. Where I approached the "filling the gap in between sole environmental and engineering measures". There I proposed to integrated both measures in the planning levels, considering the data from research in both measure types on the tsunami scenario. Is there are any ongoing projects related to this or any opportunities? Also would like to know whether there are any research tools and methodologies to use.
I also would like to continue the research further. If there are anyone interested, please let me know. (integrating environmental and engineering measures for DRR/ Climate action induced Landscape architecture.)
Thank you.
adikariishank@gmail.com

New research ideas

Replicable case studies focused on "average" urban areas

Multi-case study analyses that summarize lessons learned, best practices, etc.

methods of transitioning ideas and practices from academia to government/public/private sector context

Research project/Case studies of using trees to reduce landslides - James Kungu

interests:Climate action induced Landscape architecture, sustainable development, nature based solutions,Eco DRR and EbA

follow-up monitoring to determine which published forecasts are most useful to planners moving forward. David Wasielewski

Nature-based solutions implementation in slum and high density area - rdi@rdi.or.id

Almira Geles de Mesa
ablumbres@up.edu.ph
Green planning for cities in the developing countries

Ma. Charisma Malenab
mtmalenab@up.edu.ph
Eco-DRR/EbA and community/social development in degraded ecosystems

Ishanka Adikari(A.M.I.U.Adikari)
email;
adikariishanka@gmail.com

New publication ideas

Temporal & Spatial ATLAS :: SDGs TRAJECTORY - Linking the outcome of Design Studios (across all fields of architecture) conducted on site with SDGs.
(Aanchal Vidyasagar - avidarch@gmail.com)

a kind of compendium of incentives and persuading arguments in favour of NbS/EbA/Eco-DRR to be used for project involvement of politics, business, private sector and government

Action planning at regional level - what are the next steps
